

Databases - Differences

Relation **R(A,B,C)** has the following tuples:

A B C
1 2 3
4 2 3
4 5 6
2 5 3
1 2 6

and relation **S(A,B,C)** has the following tuples:

A B C
2 5 3
2 5 4
4 5 6
1 2 3

The differences (R-S) is computed and the following tuple is found to be present in the result. Assume that the schema of the result is (A,B,C).

4, **b**, **c**

Find the integers **b** and **c**. Fill in the values in the answer box, each on a new line.

Output Format

Two integers, corresponding to **b** and **c**, each on a new line. For example:

4
5
