

# Correlation and Regression Lines - #3

The two regression lines of a bivariate distribution are:  $4x - 5y + 33 = 0$  and  $20x - 9y - 107 = 0$ . Calculate the arithmetic means of  $x$  and  $y$  respectively. (Both of these are integer values.)

**Output Format**

In the text box, enter the two integers corresponding to the means of  $x$  and  $y$ , each on a new line.
