

# Basics of Sets and Relations #7

Consider the following data table named **Student**.

Student Name	Number	Sex
Nina	3412	F
Mike	1234	M
Nelson	2341	F

Here is another data table named **Teaching Assistants**

Subject	ID
Physics	3412
Chemistry	1111
Mathematics	2341

What is the **count of rows** returned in the following join operation?

**Student** ▷◁(Number=ID) **Teaching Assistants**

Only enter a single integer. Do not include any extra spaces or newlines.
